## How to choose your dosing system?

1 Choose the type (s) of product you are going to use (wetting / foaming, emulsifying or wetting / foaming and emulsifying)

 $\mathbf{2}_{{\scriptscriptstyle \bullet}}$ Determine your minimum and maximum product throughput using the following formula:

## Water flow rate (I / mm) x Concentration (%) = Product flow rate (I / mm)

Product flow rate (I/mn)

2 PRODUCTS Class A & B
